

# Architecture and Construction Product Brochure

# HOW WE CAN HELP YOU

## For architects and specifiers

A-SAFE has many years of experience working with architects and consultant specifiers on industrial and civil infrastructure projects of all sizes. From individual factory and warehouse developments to major airport expansions, our experts will tailor the ideal safety solution for your project. We are here to support you with all aspects of planning your installation, from providing CAD blocks for your design to working with BIM models. Our experts can also produce detailed CAD layout drawings for you.

A-SAFE safety barriers are tested to the rigorous standards of BSI PAS 13, the international benchmark for industrial safety barriers. They are also independently certified by TÜV Nord, one of the world's most respected test organisations. Our safety solutions fully comply with all relevant building standards, including BS 6399, BS EN 1991-1-1 and BS EN 1991-1-7.

# Your trusted projects partner

Safety infrastructure should never be an afterthought. A-SAFE provides best-practice safety solutions for all types of development projects. From design and base builds to bespoke solutions for more specialist requirements, we can support you at every stage of your project. Our world-class safety solutions reduce risk and increase operational efficiency from the outset. They also increase the appeal of your new building for tenants and buyers, helping you to quickly maximise the return on your development investment.

# For the contractor

Choose A-SAFE for your construction project and you will benefit from unrivalled industry expertise and a complete end-to-end service. Constructionline accredited, we offer a full turnkey solution – from planning to installation and project management. The success of your project is as important to us as it is to you. Our specialist installers have years of experience working on construction sites and will work alongside your team to ensure that your bespoke safety solution is delivered on time, on budget and fully compliant with all applicable building standards.

Highly trained, our installation specialists are SafeContractor-approved, and certified for CSCS, SSSTS and SSSMS. They are equipped with state-of-the-art installation equipment and carry all necessary PPE, enabling them to work safely, efficiently and to the highest quality standards.

**PAS13**

### A standard you can trust: PAS 13

PAS 13 is an independent global standard for workplace safety barriers. It was produced by the British Standards Institution in partnership with leading international companies including Nestlé, Mars, HSE and DHL. PAS 13 defines the criteria for the impact resistance of safety barriers. It also provides best-practice recommendations for traffic management and safety barrier installation within industrial facilities. A-SAFE products are rigorously tested to PAS 13 standards.

# WHAT MAKES US WHO WE ARE

# A-SAFE

At A-SAFE we are defined by who we are as much as by what we do. Our values are the foundation for our passion, our products and the strong relationships we forge with our customers.

## We are pioneers

### Forge not follow

From our very first invention to every process and customer interaction, we are encouraged to be brave, be dynamic and explore the possible and seemingly impossible. Big or small, it all makes a difference. The key is to always try new things, to learn, adapt and move forward. With a shared sense of enterprise and adventure, we never, ever give up and ask ourselves every day, what if?

### 1984

A-FAX Films is established, specialising in polythene extrusion.

### 2001

Flexi Barrier invented.

### 2009

Major installation at Gatwick Airport with **£100,000+** saving per year in maintenance costs.

100m Steel Barrier - Total Cost over 5 Years **£46,210**

100m A-SAFE Barrier - Total Cost over 5 Years **£7,220**

### 2015

The drive for continuous improvement leads to the launch of our 3rd-generation barrier range.

### 2017

A-SAFE continues to revolutionise workplace safety, saving more lives than any other safety barrier.

### 2018

Our global presence reaches 15 countries, with 16 subsidiaries worldwide.

### 2019

Customer problems increasingly require digital solutions, prompting us to launch our technology division.

# We are in it together

## Shoulder to shoulder

More than a collection of employees and customers, we are a collective who act and behave like a family. With mutual commitment, we build powerful, trusted relationships, both with each other and with customers all over the world. While our brand is global, our relationships are local. We get huge satisfaction from building direct relationships with customers – drawing inspiration from their problems to help us forge new ideas.

We stand shoulder to shoulder with partners all over the world, including:  
3M | Amazon | Jaguar Land Rover | Heineken | DHL | Coca Cola | Heathrow Airport  
IKEA | Mars | Kimberley Clark | McCain | Nestlé | P&G | BMW

# We do the right thing

From start to finish

There's a right way and wrong way to do things – it's in our DNA to do the right thing, without compromise. Whether we're creating, thinking, making or building – solutions, things or relationships – we take personal ownership of the whole process, finding better ways to do things than any third party could. From safety to risk reduction, protection to cost savings, whatever the problem, we never sit back while someone else does the work, we find the very best way of solving it.

Tested to a global benchmark in barrier safety

Independently certified and verified by world-class test experts

**bsi.**  
**PAS13**  
Code of Practice for  
Workplace Safety  
Barriers

We perform an average of **5 impact tests a day** and over **1,000 tests annually**. That equates to more than **10,000 tests** since creating our in-house test facility.

# Scientifically engineered safety

Whether in the resilience, flexibility and in-built memory of our exclusive Memaplex™ material or the unrivalled energy absorption of our patented 3-phase coupling system, every A-SAFE product is loaded with scientific and technical ingenuity to ensure that it performs perfectly every time you need it to.

- More advanced engineering
- More safety features
- Performance you can trust

RECOVER

## Pedestrian and vehicle routes

A-SAFE offers a complete range of proven pedestrian segregation and vehicle impact protection solutions. Furthermore, our experienced safety specialists will design your traffic management system to rigorous BSI PAS 13 standards, ensuring that safety and efficiency are at the heart of your development from the start.

- Segregate pedestrians and vehicles
- Protect against high-energy impacts where people also operate
- Define and defend pedestrian and vehicle routes
- Create pedestrian safe zones
- Control the movement of traffic

## Wall protection

- Protect buildings, machinery and equipment from impact damage
- Define and defend traffic routes
- Avoid incidents and downtime
- Protect against fork impacts and penetration

## Door protection

Roller doors and loading bay doors are especially vulnerable to vehicle impacts. Protect your new development from impact damage with high-performance industrial bollards and height protectors from A-SAFE.

- Prevent impact damage from high vehicles, high vehicle loads and forklift truck masts
- Protect overhead assets
- Safeguard infrastructure, such as doorframes and loading docks
- Prevent damage with audible and visual alarms

## Column protection

- Segregate and guide vehicles away from critical structures
- Physically protect columns, building supports and vertical structures from impact damage
- Shield infrastructure from vehicle collisions
- Defend any size, shape or location of column

Impact damage from forklift trucks and other workplace vehicles can weaken columns and other vertical structures. A-SAFE iFlex Rail column guards provide premium impact protection to these vulnerable areas, while also serving as visual guidance to vehicle drivers.

## Cold storage facilities

Food-safe, robust and effective to  $-30^{\circ}\text{C}$ , Cold Storage products from A-SAFE have been purpose-designed for use in frozen food storage facilities and other challenging sub-zero environments. Benefit from the ultimate in low-temperature performance and reduced maintenance costs without compromising on hygiene.

The A-SAFE Cold Storage range has been meticulously engineered to provide the highest levels of protection to pedestrians, assets and infrastructure. From the robust rack protection of RackGuard, to PAS 13 compliant fork protection, bollards, barriers and height restrictors, the Cold Storage range offers a full suite of high-performance safety products for applications within very low-temperature environments.

## Loading bay protection

Prevent structural damage and premature wear to buildings and service yard structures with a range of heavy-duty loading bay protection solutions from A-SAFE.

## Accessories

Customise your installation while enhancing safety and efficiency, with a range of practical accessories including access gates, signage and slider plates.

# A local company, globally.

We work hard to maintain the spirit of a local business while achieving the far-reaching impact of a global enterprise.

Our policy of being "Global and Local" enables us to respond to your needs wherever you are in the world. In every office worldwide, we employ local experts throughout the business. Specialists in their field, equipped with an in-depth knowledge of domestic markets, legislation, safety practices and social customs.

We strive to give all workplaces access to world-class products, through local offices and consultants.
